序言 Foreword

華語熱是當前國際社會語言學習的普遍現象，全球各地學習需求日益殷切，學習人數不斷攀升，特別是長期投注華語教學的海外僑校也掌握華語學習需求熱潮，參與非華裔社群的華語教學工作，朝與主流接軌的方向發展。

在僑教發展的基礎上，為推展海外華語文教育，並因應全球華語文教學趨勢變化以及學習環境改變等情勢，本會特別邀集專業編撰團隊，編寫《來！學華語》系列教材。第一至第四冊著重於語言基礎的建立；而第五、六冊則進一步將文化與語言學習結合，涵蓋居住、旅行、飲食、信仰及工藝等多元主題，使學習者能在語言訓練之外，更加深入體驗臺灣文化，拓展學習視野。

本會多年來於海外推動僑民教育及華語文學習不遺餘力，企盼本書不僅能提升華語文教學技巧與內涵，展現正體字華語文優質、多元及豐富特色，也能推展具臺灣特色的華語文市場。

The Huayu (Mandarin) fever is an emerging phenomenon in current international society. The demand for learning and the number of learners are increasing steadily worldwide. Overseas compatriot schools have long been involved in Mandarin teaching and, abreast of the burgeoning demand for learning Mandarin, have been moving toward integration with the mainstream.

To promote overseas Mandarin learning and respond to changes in global teaching trends and the learning environment, the Overseas Community Affairs Council (OCAC) assembled a professional team to develop the *Let's Learn Mandarin* series. While the first four volumes focus on building a solid foundation in language, the fifth and sixth volumes further integrate culture with language learning, covering diverse themes such as housing, travel, beliefs, cuisine, and craftsmanship. In this way, learners can move beyond language training to gain a deeper experience of Taiwan's culture and broaden their perspectives.

The OCAC has tirelessly promoted overseas compatriot education and Mandarin learning for many years. It is hoped that this textbook will not only enhance the quality of Mandarin teaching but also expand the market and showcase the richness and diversity of Taiwan's traditional characters.

編者的話 Editor's Note

一、編輯理念

1. 海外成人學習者，在學習《來！學華語》一～四冊後，對臺灣文化方面更感興趣，五、六冊將透過結合了文化的語言學習，使學習者深入與廣泛地了解臺灣文化。第六冊（本冊）奠基於第五冊的語言能力，持續往深度與廣度發展。
2. 非使用《來！學華語》的學習者，只要達到臺灣華測會 B1 程度後，能藉由此書繼續提升語言與文化方面的能力與知識。
3. 以臺灣之傳統文化，及現代社會常見的文化面向為取材範圍，著重傳統與創新的結合，增加課本的實用性。
4. 以國家教育研究院制定的「臺灣華語文能力基準（TBCL）」詞語及語法點分級標準為編寫依據。
5. 課文採篇章形式，適合呈現以文化為主題之內容，不但可提升學習者篇章閱讀理解及段落表達之能力，也有助於未來閱讀新聞類材料。
6. 採主題單元形式編寫，安排課程時具彈性。每個單元包含兩個主題相關卻不同面向的內容，教師可依學習者需要的，或選擇學習者較感興趣的單元來教學。

二、教材架構

1. 課本：第六冊分為六個單元，第一至五單元各兩課，第六單元一課，共十一課。
   第一單元：傳統與創新
   第二單元：寶島采風
   第三單元：臺灣傳統戲曲
   第四單元：食在臺灣
   第五單元：行行出狀元
   第六單元：Taiwan Can Help
2. 課文：採篇章短文方式呈現。以正體字為主，同時呈現簡化字。課文漢字搭配注音符號。另，漢拼課文、英文課文列於課文之後。期盼學習者到達一定程度後，能培養不依靠漢拼來閱讀漢字，了解課文內容之能力。
3. 生詞：標示注音符號及漢語拼音、詞性及英文翻譯。依據國教院（TBCL）語詞分級。第六冊以第四～六級詞語為主，生詞及專有名詞共 619 個。
4. 語法與句型：以國教院（TBCL）第四、五級語法條為主，共 32 條語法與練習。
5. 課後任務：每課指定與課文主題相關的任務活動，由學生自己查找、認識相關內容，進而能與該國文化對比，討論、表達對主題之看法。
6. 補充資源：提供與主題相關的網站、影片，透過這些真實的社會資源，學習者可以進一步了解臺灣的現況，不只文字的描述，更能透過眼睛看到真實的臺灣。
7. 詞彙索引附錄於後。

I. Editorial Philosophy

1. Volume 6 of *Let's Learn Mandarin* enables overseas adult learners, whose interest in Taiwanese culture has been piqued following study using Volumes 1 to 5, to gain a deeper and broader understanding of Taiwanese culture via instruction that combines culture and language. Volume 6 builds on the language skills developed in Volume 5 to continue broader and deeper development.
2. Learners who have not previously used *Let's Learn Mandarin* need only attain the TOCFL B1 language proficiency level to be able to use this volume for further enhancement of their language capabilities and cultural knowledge.
3. The lesson material drawn from Taiwan's traditional culture and cultural aspects frequently apparent in its modern society stresses the integration of tradition with innovation to enhance the practicality of lesson content.
4. The "Taiwan Benchmarks for the Chinese Language" (TBCL) developed by the National Academy for Educational Research comprise the editorial basis of these volumes.
5. The chapter format adopted for the lesson texts is suited to presenting culturally themed content. This enhances the ability of learners to read and understand chapters and express themselves in paragraphs, and will be helpful for reading news materials in the future.
6. The lessons herein have been written in a thematic unit format for flexibility in course arrangement. Each unit includes content for two thematically related yet distinct topics. Teachers can provide instruction according to learner needs or choose a unit of comparative interest to learners.

II. Textbook Structure

1. Textbook: Volume 6 of the *Let's Learn Mandarin* series contains 6 units, with Units 1 through 5 comprising 2 lessons, and Unit 6 a single lesson, for a total of 11 lessons.
   Unit 1: Tradition and Innovation
   Unit 2: Precious Island Experience
   Unit 3: Taiwanese Traditional Opera
   Unit 4: Eating in Taiwan
   Unit 5: Every Profession Has a Top Performer
   Unit 6: Taiwan Can Help
2. Text: Each lesson text is presented in the form of short passages principally rendered in Traditional characters and also in Simplified characters. The characters of the text are accompanied by Mandarin phonetic symbols. This is followed by a rendering of the text in Hanyu Pinyin and then in English. It is hoped that upon reaching a certain level of proficiency, learners will cultivate the ability to read the characters without relying on Hanyu Pinyin for an understanding of text content.
3. Vocabulary: Each vocabulary item is presented in Mandarin Phonetic Symbols, Hanyu Pinyin with tone markings, Traditional characters, part of speech, and English translation. Volume 6 presents 619 words and proper names in all, primarily from TBCL vocabulary Level 4 through Level 6.
4. Grammar/Sentence Patterns: Volume 6 presents a total of 32 grammar items and exercises principally drawn from TBCL Level 4 and Level 5.
5. After-class assignments: Each lesson includes assigned activities pertaining to the lesson topic in which the student on their own is to search for and recognize relevant content, then is able to compare it with the culture of their own country and discuss it to express their views on the topic.
6. Supplemental resources: Links to websites and videos pertaining to the topic are provided so that learners can further understand the current situation in Taiwan via these real-life social resources and not just written descriptions, and get to see the real Taiwan with their own eyes.
7. A glossary index is appended hereafter.

在臺灣（台湾），一般城市的郊區（区）或是鄉（乡）下地方，還（还）可以看到三合院。這（这）種（种）傳（传）統（统）建築（筑）的屋頂（顶）是紅（红）色的瓦片，牆壁（墙）則（则）是由磚（砖）頭（头）堆起來（来）的，三面房屋排成一個（个）「 冂 」的形狀（状），中間（间）有一個（个）可以晒稻穀（谷）的廣（广）場（场）。三合院不只是房子，也是一個（个）家族生活的中心。隨（随）著（着）時（时）代的改變（变），很多人搬到城市居住，老房子慢慢地就空了。許（许）多三合院變（变）得十分破舊（旧），甚至荒廢（废）。但是也有些被重新利用，有了新的樣（样）貌。

我家附近有一棟（栋）三合院，過（过）去住著（着）三代同堂的一家人。大廳（厅）很寬（宽）敞，兩（两）旁的護龍（护龙）和中間（间）的廣場（广场）都保存得很完整。雖（虽）然屋頂（顶）的瓦片有些破損（损），牆（墙）面也不太

乾淨，但整個房子還是很堅固。幾年前，政府和民間熱心的人合作，修復了這棟三合院。他們留下了舊的磚頭牆壁和木門，屋頂換了新的瓦片，讓老房子不但保留了歷史的意義，而且也能重新使用。

修復後的三合院變成了一家咖啡店。大廳裡放了木頭桌椅，牆上掛著臺灣現代藝術家的作品。護龍的一邊是展覽中心，展示工藝品，另一邊則是閱

英文課文 Text in English

In Taiwan, Sanheyuan (three-sided courtyard) houses can be found in the suburbs of many cities and rural areas. These traditional structures feature red-tiled roofs and brick walls. The houses are arranged on three sides in a " ㄇ " shape, with a central plaza for drying rice. Sanheyuan houses were more than just homes; they served as the center of family life. Yet, as times changed and many people moved to cities, the old houses gradually became empty. Many Sanheyuan houses have become dilapidated or even abandoned. However, some have been repurposed and given a new lease of life.

There is a Sanheyuan house near my residence, once home to three generations of a family. The main hall is spacious, with wings on both sides and the central courtyard perfectly preserved. While the roof tiles were a bit chipped and the walls weren't very clean, the house itself remained remarkably sound. A few years ago, the government collaborated with dedicated individuals to restore this Sanheyuan house. They preserved the old brick walls and wooden doors, and replaced the roof with new tiles. This way not only allowed the house to retain its historical significance but also facilitated its renewed use.

The restored Sanheyuan house has been transformed into a coffee shop. Wooden tables and chairs have been placed in its lobby, and the walls are decorated with works by modern Taiwanese artists. One of the wings features an exhibition center displaying handicrafts, while the other is a reading room fully stocked with books. The original courtyard, now furnished with potted plants and a few wooden tables and chairs, has been transformed into a spacious plaza where guests can enjoy coffee in the sun. This design seamlessly blends traditional architecture with modern living.

The café quickly has become a popular spot in the community. On weekends, crowds flock to enjoy coffee, view exhibitions, and take photos. The old house is no longer just a dilapidated structure, but a vibrant place. Here, people can enjoy a quiet moment while appreciating the beauty of the traditional Sanheyuan house style. Many visitors have remarked that they are inclined to linger and reluctant to leave this place brimming with old house stories and new modern culture.

This example tells us that old houses don't necessarily need to be demolished, but rather we need to consider how to preserve their significance. Many Sanheyuan houses, though dilapidated, have a unique appearance and structure, and possess a distinct charm. If used to develop cultural and creative arts, or to house coffee shops, teahouses, restaurants, or bed and breakfasts, they can become community centers and tourist attractions. The story

of an old house isn't an end, but rather a new beginning, a place not only for memories but also for a part of future life. This rebirth of an old house allows tradition and modernity to coexist in one place, blending new and old to create an unforgettable experience.

現在，人們的日常生活幾乎離不開科技。我們每天都會使用智慧型手機、電腦和各種智慧型設備，這些科技產品讓我們擁有了「智慧新生活」。我心裡常常想，如果沒有這些科技，我們的生活會變成什麼樣子呢？

「智慧新生活」指的是利用物聯網、大數據和人工智慧等技術，把不同的設備連在一起，讓生活變得更方便。換句話說，就是用科技來提高生活的品質和效率。例如，我每天早上起床的時候，只要關掉手機的鬧鐘，家裡的智慧窗簾就會自動打開，咖啡機也會開始煮咖啡。出門前，我只要在手機上按一下，就能確認家裡所有的電器是否已經

不只是家裡，城市裡也有很多智慧

科技的設備。例如：我常利用公車的即

不過，「智慧新生活」也帶來一些需要注意的問題。像我每天使用這麼多智慧設備，個人資料一定會被記錄下來。如果沒有好好地保護這些資料，就可能造成個人資料外洩。此外，我也發現有些年紀大的人因為不熟悉科技，而對新的生活方式難以適應。例如：我的父母就常抱怨，到餐廳吃飯還得

Lesson 02 智慧新生活

用手機(机)掃(扫)描QR Code來(来)點(点)菜，讓(让)他們(们)覺(觉)得非常麻煩(烦)。如果城市的公共服務(务)完全數(数)位化，可能會(会)給(给)他們(们)帶(带)來(来)困擾(扰)。因此，在我們(们)享受智慧科技的便利時(时)，也應(应)該(该)思考如何解決(决)科技產(产)生的問(问)題(题)。

未來(来)，我相信臺灣(台湾)一定會(会)繼續(继续)發(发)展「智慧新生活」。希望政府和企業(业)能努力地把科技和人文結(结)合在一起，讓(让)人們(们)在使用科技的時(时)候，都感到安心和溫(温)暖，每個(个)人都能擁(拥)有更美好的生活。

英文課文 Text in English

Nowadays, technology is almost indispensable in daily life. We use smartphones, computers, and various smart devices every day, and these technological products allow us to have a "smart new life." I often wonder, if there weren’t these technologies, what would our life become?

A "smart new life" refers to using technologies such as the Internet of Things, big data, and Artificial Intelligence to connect different devices together, allowing life to become more convenient. In other words, it is the use of technology to raise the quality of life and efficiency. For example, every morning when I get up, as soon as I turn off the alarm clock [applet] on my mobile phone, the smart curtains in my home automatically open, and the coffee maker starts brewing coffee. Before I head outside, I only need to tap on my phone,

and am able to confirm whether or not all the appliances at home are turned off. Before returning home, I will also first use my phone to turn on the air conditioning so that I can enjoy cool air as soon as I step inside. My community apartment building also uses a smart system, so I don't need keys; I can enter it using my mobile phone or fingerprint.

It's not just in the home; the city also has many smart technology facilities. For example, I often use real-time bus information to look up when the next bus will arrive, so I don't have to wait for it the whole time in front of the bus stop sign. When driving, I use a navigation system to guide me to my destination and am able to grasp traffic conditions so as to avoid going toward congested sections of the route. Medical care has also become more efficient because of technology. Sometimes when I can't go out of the house, I use telemedicine to see the doctor via video teleconferencing. These smart technologies make me feel that city life is extraordinarily convenient.

However, the "smart new life" also brings with it some problems that require attention. Like with my using so many smart devices daily, my personal data is certainly being recorded. If this data isn't properly protected, it could lead to leaks of my personal data. In addition, I've also noticed that some older people, because they are unfamiliar with the technology, have difficulty adapting to new ways of living. For example, my parents often complain that when they go to a restaurant, they still have to scan QR Code with their mobile phones to order food, and this makes them feel extremely frustrated. If public services in a city were completely digitized, it might bring them troubles. Therefore, while we enjoy the convenience of smart technology, we should also consider how to solve the problems it produces.

In the future, I believe Taiwan will continue developing this "smart new life." Let's hope that the government and businesses can work together to combine technology with a human touch, allowing people when they use technology to feel at ease and warm, so that each can have an even better life.

任務 Assignments

任務一：我的一日智慧生活
Assignment One: A Day in My Smart Life

1. Group Discussion: Form a group with your classmates, then after consulting the text, discuss and list what "smart technologies" you might use from morning to night throughout the day. (For example: using a mobile phone for tapping to enter a subway station, ordering food through a food delivery platform, checking traffic conditions with navigation, making video calls with friends, registering for medical appointments online, ordering food by scanning a QR Code, etc.)
2. Role-playing: Each group selects two students, one to play the "Tech Geek" and the other to play the "Senior Citizen (Older Person)" who is new to technology.

1. 分組討論：請同學分組，參考課文內容，討論並列出一天當中，從早到晚可能會用到哪些「智慧科技」？（例如：用手機刷卡進地鐵站、用外送平臺點餐、用導航查看交通狀況、與朋友視訊通話、線上掛號、掃 QR Code 點餐等）。

2. 角色扮演：各組選出兩位同學，一位扮演「科技達人（專家）」，一位扮演「剛接觸科技的長輩（年紀大的人）」。

情境：長輩想學習如何使用上面討論的某項智慧功能。達人須教導長輩如何使用智慧型功能，並解決長輩遇到的困難。

Scenario: The senior citizen wants to learn how to use one of the smart features discussed above. The tech geek must teach the senior citizen how to use the smart feature and solve any difficulties they encounter.

任務二：智慧城市大調查

臺灣本島是一個南北長型的高山島，擁有東北亞第一高峰——玉山。地理資源豐富，地形複雜多變，其中，面積最廣的是山地，主要分布在島中央到東部。

位於中央山脈與太平洋之間的花蓮、臺東地區，風景迷人。十六世紀，葡萄牙人從海上經過這裡，看到美麗壯觀的山水景色，驚呼：「FORMOSA（美極了）！」從那時起，臺灣就有了「福尔摩沙」這個名字。東部的太魯阁国家公园是必遊的景點，溪谷、岩壁、隧道不斷。到了花東記得放慢腳步，除了欣賞自然美景，同時也別忘了大口呼吸新鮮的空氣。

Lesson 03 看見福爾摩沙

南臺灣的墾丁有美麗的沙灘、清澈的海洋，加上四季如夏，全年都適合潛水、衝浪，是水上活動愛好者的天堂。阿里山則以日出、雲海聞名，遊客在清晨搭小火車上山，等著看太陽從雲海中出現。南部城市裡，臺南是歷史最悠久的古都，十九世紀末以前，一直是臺灣政治、經濟與文化的重心，古蹟特別多。高雄市內的美麗島捷運站被選為世界最美的地鐵站之一，是熱門的拍照打卡地點。

中部因為氣候與地理環境良好，花卉、水果的種類豐富，尤其是花卉，種植面積、產量和產值都是全臺第一。這裡有日月潭、高美溼地等風景區，還有不同主題的遊樂園、度假村和觀光農場。臺中市區的自然科學博物館裡有各種互動遊戲，適合親子一起參觀、操作。彩虹眷村和臺中歌劇院也值得一看。中部地區包含自然景觀、休閒遊樂與文化體驗，可以滿足遊客不同的需求。

沿著北海岸走，一路上看得到各種奇岩怪石，最知名的是野柳女王頭。如果對火山地形有興趣，建議你到陽明山國家公園看看，此外，每年春天，陽明山花季也吸引大批觀光客。至於第一次到臺灣旅行的人大多不會錯過夜市、

英文課文 Text in English

Taiwan is a mountainous island stretching north to south in length that contains Northeast Asia's highest peak, Yushan. Its geographical resources are abundant and its terrain varied and complex, with most of its area covered with mountains primarily distributed from the central to the eastern part of the island.

The Hualien and Taitung areas located between the Central Mountain Range and the Pacific Ocean have enchanting scenery. In the 16th century, Portuguese seafarers passing by this place upon seeing its gorgeous and spectacular landscapes exclaimed, "*Formosa*!" From that time onward, Taiwan has had the name Formosa. Taroko National Park in the east is a must-see attraction, with its endless variety of gorges, cliffs, and tunnels. After arriving at Hualien and Taitung, remember to slow your pace and breathe in the fresh air while admiring the natural beauty.

Kenting in southern Taiwan has beautiful beaches, clear ocean waters, and a summery climate all four seasons suitable for diving and surfing, that make it a paradise for water sports enthusiasts. Alishan is renowned for its sunrises and seas of clouds; visitors take a small train up the mountain at dawn to watch the sun emerge from the clouds. Among the southern cities, Tainan is the historically longest-serving ancient capital, Taiwan's political, economic, and cultural center until the late 19th century, and rich in historical sites. Kaohsiung City's Formosa Boulevard Station has been selected as one of the world's most beautiful metro stations and is a popular spot to take photos and check in.

Due to its favorable climate and geographical environment, Central Taiwan has an abundant variety of flowers and fruits, especially flowers, with the greatest planting area, yield, and output value of anywhere in Taiwan. Here are such scenic areas as Sun Moon Lake and the Gaomei Wetlands, as well as various themed amusement parks, resorts, and tourist farms. The National Museum of Natural Science in Taichung City has a variety of interactive games, making it suitable for family visits. Rainbow Village and the Taichung National Theater are also worth a look. Central Taiwan, which includes natural landscapes, leisure and recreation, and cultural experiences, can satisfy diverse visitor needs.

Going along the North Coast, you'll see various uniquely shaped rocks and stones, the most famous being the Queen's Head rock formation in Yehliu Geopark. If you're interested in volcanic terrain, visiting Yangmingshan National Park is recommended. Additionally, the Yangmingshan Flower Festival attracts a large number of tourists every spring. As for first-time visitors to Taiwan, most would not miss the opportunity to visit night markets, the National Palace Museum, and Taipei 101, while enjoying the pleasures of

delicious food, checking out antiques, strolling around, and shopping. Northern Taiwan not only has a trendy and prosperous modern scene, but also quaint old streets, such as Jiufen, Tamsui, and Sanxia. Among these, Tamsui is also an excellent spot for admiring the sunset.

Taiwan may be small, but it is brimming with charm. With mountains and rivers, and cultural diversity, every corner is worth savoring in detail.

臺灣除了本島以外，還有兩百多座大大小小的離島，包括澎湖、金門、馬祖、綠島、蘭嶼、小琉球等，各有各的魅力。

澎湖在臺灣西南方海上，由九十多座島嶼組成，壯觀的玄武岩地形最具代表性，有「上帝的石雕公園」之稱。這裡一年四季都有不同的活動：春夏有熱鬧浪漫的花火節，還有各式各樣的沙灘和水上遊樂設施，遊客能盡情享受玩水的樂趣，秋冬則有海鮮節，能品嚐到最新鮮的海洋美味。清澈的海灣以及冬天的海風，更使澎湖成為國際風帆比賽的重要場地，吸引各國選手來挑戰。

金門和馬祖因為地理位置特殊，四十多年來都是軍事重地，一直到民國八十一年（西元1992年）才解除軍事管制。開放觀光以後，當時留下來的炮台、地下坑道、標語等，形成獨特的戰地風光，許多不再使用的軍事設施變成了民宿、餐廳、咖啡館，也讓金門和馬祖成為熱門的旅遊地區。在金、馬，除了體驗戰地文化，還能從保存下來的傳統建築中感受到濃濃的古意。當地知名的金門高粱酒與馬祖老酒，更是旅客必買的伴手禮。

綠島和蘭嶼位於臺東外海。兩座島都是火山島，擁有壯麗的海岸線與豐富的珊瑚礁景觀，由於沒有受到工業汙染，附近海洋生物種類多樣，是探索海底世界的理想地點。綠島的白色燈塔是重要地標之一，從塔上能看到整座島的美景。還有世界少見的海底溫泉，可以一邊泡湯，一邊欣賞日出。蘭嶼之所以有「蘭嶼」這個名字，是因為島上早期盛產蘭花。住在這裡的雅美（達悟）族人，是臺灣唯一居住在離島的原住民族，至今仍然保持著傳統文化與風俗。

Lesson 04 悠遊離島

在屏東西方海上的小琉球，是台灣離島中唯一的珊瑚礁島。氣候溫和，是觀賞海龜的知名地點。小琉球面積不大，島上沒有紅綠燈，最受歡迎的環島方式是騎電動機車，既輕鬆，又環保，是享受悠閒生活與生態旅遊的好選擇。

Taiwan, besides the main island, has more than 200 outlying islands of varying sizes, including Penghu, Kinmen, Matsu, Green Island, Orchid Island, and Liuqiu Island, each with its own charm.

Penghu, located southwest of Taiwan, comprises over ninety islands. Its spectacular basalt terrain is the most representative, and it is hailed as "God's Stone Sculpture Park." Throughout the year, Penghu offers a variety of activities. Spring and summer feature a lively and romantic fireworks festival, along with diverse beaches and water sports facilities, so visitors can fully enjoy all sorts of water activities. Autumn and winter host a seafood festival, where visitors can savor the freshest seafood delicacies. Its clear bays and winter sea breezes also make Penghu an important venue for international sailing competitions, attracting sportsmen from around the world to meet the challenge.

Kinmen and Matsu, due to the particularity of their geographical location, were key military spots for over forty years. It was right up until the 81st year of the Republic of China (1992) before military control [there] was lifted. After being opened to tourism, the remaining artillery positions, underground tunnels, and slogans created a unique battlefield scene. Many unused military facilities were converted into guesthouses, restaurants, and cafes, making Kinmen and Matsu popular tourist destinations. In Kinmen and Matsu, besides experiencing battlefield culture, visitors can also feel a rich sense of the past from the preserved traditional architecture. The locally renowned Kinmen Kaoliang Liquor and Matsu Aged Liquor are must-buy souvenirs for tourists.

Green Island and Orchid Island are located in the open sea offshore from Taitung. Both are volcanic islands with magnificent coastlines and abundant coral reef landscapes. Due to their not being subject to industrial pollution and nearby marine life being diverse, they are ideal locations for exploring the underwater world. Green Island's white lighthouse is one important landmark from which one can view the entire island’s gorgeous scenery. There are also rare underwater hot springs where you can soak while enjoying sunrise. The reason why Orchid Island has the name “Orchid Island” is because of the abundant production of orchids on the island in early times. The Yami (Tao) people, the only Indigenous People in Taiwan residing on an outlying island, still maintain their traditional culture and customs to this day.

Liuqiu Island, located in sea waters west of Pingtung, is the only coral reef island among Taiwan's outlying islands. With its mild climate, it's a well-known spot for sea turtle watching. Liuqiu Island is small and has no traffic lights; the most popular way to explore

the island is by electric scooter, which is relaxing and environmentally friendly, and a good choice for enjoying a laid-back life and ecotourism.

Taiwan's outlying islands are not just scenic and enchanting. Even more, each of them has developed unique cultural features and natural landscapes due to its historical background, geographic location, terrain characteristics, and ecological environment, leaving visitors with wonderful and unforgettable memories.

課文 Text

「歌仔戲」是臺灣最具代表性的本土傳統戲曲，起源於十九世紀末的臺灣宜蘭，最早是由福建漳州民間流行的「歌仔」和「車鼓戲」發展來的。「歌仔」是每首四句，每句七個字或五個字的民間歌謠，「車鼓戲」則是又歌又舞的戲曲。當時在宜蘭地區漳州的移民很多，因此「歌仔」與「車鼓戲」，就在宜蘭融合成「本地歌仔」。後來又結合了其他戲曲，穿上了戲服，化了妝，打扮成各種角色上臺，才成為現在臺灣的「歌仔戲」。

「歌仔戲」是用臺灣台語來表演的，音樂具有明顯的地方特色，旋律優美動聽。戲曲內容通俗易懂，有具教育

Lesson 05 臺灣戲曲—歌仔戲

意義的歷史故事，也有與人民生活有關的愛情故事。觀眾就是不認識字，也能透過動作與旋律產生共鳴。

歌仔戲最早是為了感謝神，在廟口以「野臺戲」的形式演出，是人民生活中重要的娛樂和宗教儀式，就是到現在也還能在廟前看到一些野臺戲。後來隨著廣播、電視興起，歌仔戲透過媒體進入家庭。電視歌仔戲吸引了成千上萬的觀眾，並創造出許多知名的歌仔戲演員，更是許多人的回憶。

近年來，娛樂形式多元化，歌仔戲的觀眾逐漸減少，對傳統戲曲帶來很大的影響，因此有一些歌仔戲劇團像「明華園」積極改革，引進現代的舞臺技術、燈光設計，讓歌仔戲展現出既傳統

又創新的樣貌，不但登上國家戲劇院的舞臺，甚至到國外巡迴演出。此外，劇團也常到校園表演，並改變演出方式，從臺上走到臺下，與觀眾互動，讓歌仔戲更吸引年輕觀眾。

政府與民間團體也推廣歌仔戲，學校把歌仔戲放進課程當中，也在校園成立社團，年輕一代有機會接觸並且了解這項傳統戲曲，讓傳統藝術的種子在年輕人心中，發芽、長大。

英文課文 Text in English

Taiwanese Opera (Gezixi) is Taiwan's most representative native traditional opera, originating in Yilan, Taiwan during the late 19th century. It developed from Gezi and Chegu Opera popular in Zhangzhou, Fujian. Gezi are four-line folk ballads with each line of seven or five characters, while Chegu Opera is a type of opera that has singing and dancing. At that time, many immigrants from Zhangzhou settled in the Yilan area, leading to the fusion of Gezi and Chegu Opera into "native Gezi." Later, it incorporated other opera styles, such as performers wearing costumes, applying makeup and dressing as various character role types, to become the Taiwanese Opera of today.

Taiwanese Opera is performed in Taiwanese Taigi, and its music has a distinct local flavor, with beautiful and melodious tunes. The content of the operas is popular and easy to understand, with historical stories of educational significance, as well as love stories relating to people's lives. Even if the audience is illiterate, resonance can still be produced through the actions and melodies.

At the outset, Taiwanese Opera was performed in front of temples as a form of impromptu folk opera on makeshift stages to thank the gods. It was an important entertainment form and religious ritual in people's lives, and even today, some makeshift-stage impromptu folk opera performances can still be seen in front of temples. Later, with the rise of radio and television, Taiwanese Opera entered homes via the media. TV Taiwanese Opera attracted tens of thousands of viewers, created many famous Taiwanese Opera actors, and for many people became a fond memory.

Lesson 05 臺灣戲曲—歌仔戲

In recent years, entertainment forms have diversified and the audience for Taiwanese Opera has gradually diminished, having a great impact on traditional opera. Consequently, some Taiwanese Opera troupes, like Ming Hwa Yuan, have actively reformed their practices, introducing modern stage technology and lighting designs to let Taiwanese Opera present an appearance that is both traditional and innovative. They have not only staged performances at the National Theater but have even performed on international tours. Furthermore, the troupes frequently perform on school campuses, changing their performance style by heading down from the stage into the audience and interacting with them, making Taiwanese Opera more appealing to younger audiences.

The government and civic organizations are also promoting Taiwanese Opera. Schools have incorporated Taiwanese Opera into their curriculum and established clubs on campus, giving the younger generation the opportunity to come into contact with and understand this type of traditional opera, allowing the seeds of traditional art to sprout and grow in the hearts of young people.

Taiwanese Opera has continuously developed and innovated in line with societal changes, moving from makeshift stages in temple forecourts to television, and then to modern theatrical venues and international stages. By showcasing the emotions of the Taiwanese people and the diversity of native culture, Taiwanese Opera is not just a performing art; it is also a microcosm of Taiwanese society and culture.

課文 Text

布袋戲是臺灣最具代表性的傳統表演藝術之一，融合了民間信仰、文學、戲曲與手工藝。以小巧的戲偶為主，表演師傅靈活地運用手掌操控戲偶的動作，配合優美的唱腔、口白展現出獨特的藝術魅力。從早期的廟口演出到現代的電視與網路傳播，布袋戲的形式雖然不斷變創新，但始終存在於民眾的生活與情感中。

布袋戲起源於十七世紀，由福建泉州傳到臺灣。早期為了感謝神明和娛樂民眾，在廟會或祭典上演出，內容多半是以勸人做好事為主。當時戲偶的頭、手、腳都是用木頭雕刻成的，頭部是中空的，手指可以伸進去操控戲偶，身體

和四肢則是用布做成的。操控戲偶的師傅配合音樂，透過唱、念、動作表現出角色的個性與情感。這種結合手工藝與戲劇的表演形式，不僅娛樂民眾，也傳播道德觀念與做人做事的道理。

隨著電視的普遍，布袋戲進入新的發展階段。1960 年代，一些布袋戲劇團登上電視，引起布袋戲大流行，特別是 1980 年代的「雲州大儒侠史艷文」，劇中緊張的劇情、英雄的形象，受到全臺民眾的歡迎，讓布袋戲进入各個家庭，也奠定了現代布袋戲的基礎。

然而，後來因為電視娛樂的種類增加，布袋戲在 1980 年代後逐漸沒落。就在這個時候，「霹靂布袋戲」劇團為臺

Lesson 06 臺灣布袋戲的魅力

現代布袋戲不僅在傳統劇場表演，更與動畫、電玩，甚至流行音樂合作，展現出強大的創新力。除了霹靂劇團以外，也有一些年輕的團隊以小型劇場與校園巡迴表演的方式，再次展現出布袋戲的文化精神。

臺灣布袋戲從廟口野臺戲發展成跨國娛樂產業，它既保留了傳統宗教、娛樂的功能，也隨著時代演變融入現代媒體與藝術形式，充分表現出臺灣文化的創造力，成為傳統與現代結合的文化象徵。

英文課文 Text in English

Glove Puppetry is one of Taiwan's most representative traditional performing arts, blending folk beliefs, literature, opera, and handicraft. With compact puppets as its mainstay, master performers agilely use their hands to control the action of the puppets, accompanied by beautiful singing and dialogue to manifest a unique artistic charm. From temple performances in early times to modern television and internet broadcasts, Glove Puppetry may have undergone continuous formal change and innovation, yet it has existed throughout it all in the lives and emotions of people.

Glove Puppetry originated in the 17th century and spread to Taiwan from Quanzhou, Fujian. In early days, it was performed at temple fairs or festivals to thank the gods and entertain the public, with content mostly urging people to do good deeds. At that time, the puppets' heads, hands, and feet were carved from wood; the heads were hollow, allowing fingers to extend inside and control the puppets, while the bodies and limbs it is made of cloth. The master [puppeteer], accompanied by music, expressed the characters' personalities and emotions through singing, recitation, and movement. This form of performance, combining handicraft and opera, not only entertained the public; it also annunciated ethical concepts and parables about how to be a good person.

With the widespread use of television, Glove Puppetry entered a new stage of development. In the 1960s, some Glove Puppetry troupes appeared on television, eliciting immense popularity for Glove Puppetry. The 1980s production of "The Scholar Swordsman" in particular was warmly welcomed by people across Taiwan for its tense plot and heroic image. This led to Glove Puppetry entering every household, and also laid the foundation for modern Glove Puppetry.

However, later, due to an increasing variety of television entertainment, Glove Puppetry gradually went into decline after the 1980s. It was at this time that the Pili Glove Puppetry troupe injected new vitality into Taiwanese Glove Puppetry. They introduced modern film technology as well as sound and lighting special effects that combined Glove Puppetry with martial arts, fantasy, and technology to initiate a new audiovisual sensation. This transformed Glove Puppetry from traditional folk entertainment into cross-generational pop culture. The Pili troupe also brought Glove Puppetry to the international market, making Taiwanese Glove Puppetry into one of the symbols that represent Taiwanese culture.

Modern Glove Puppetry is not only performed in traditional theaters; it also collaborates with animation, video games, and even pop music, demonstrating powerful innovation. In addition to the Pili troupe, there are also some teams of young people once again demonstrating the cultural spirit of Glove Puppetry through small-scale theater and campus tour performance approaches.

From temple fairs and outdoor popup stage performances, Taiwanese Glove Puppetry has developed into a transnational entertainment industry. It has both maintained its traditional religious and entertainment functions, and has evolved in line with the times to incorporate modern media and art forms, fully demonstrating the creativity of Taiwanese culture and becoming a cultural symbol of combining tradition with modernity.

課文 Text

養生是臺灣人生活的一部分，尤其注重透過飲食來養生。人們相信，吃對東西除了能保養身體，也能預防生病，甚至治療疾病，因此形成了獨特的養生飲食文化。

臺灣的養生文化受傳統醫學影響，最主要的原則是取得身體內部的平衡。從飲食的角度來看，傳統醫學對食物的分類，不是西方的營養概念，而是按照食物的性質分成寒、涼、溫、熱等類別，對身體也是按照體質的虛寒或燥熱來了解。如果身體是虛寒的，就要用溫熱的食物來取得平衡，也就是俗稱的「補」。如果身體是燥熱的，就要用寒涼的食物來平衡，俗稱「去火」。

在日常生活中，人們如何運用食物來養生呢？第一個層面與氣候有關，人們會因應一年四季的氣候，各有不同的食補方法，基本上對大部分人都適用。

例如：夏季溫度高，身體會比較燥熱，為了平衡就要涼補，也就是說要多吃性質寒涼的食物，像苦瓜、綠茶、椰子汁等。到了冬季天氣冷，身體的新陳代謝比較慢，常常讓人手腳冰冷，就需要熱補。人們會多吃性質溫熱的食物，像薑母鴨、羊肉爐等來溫暖身體，促進新陳代謝。

第二個層面，跟個人的身體狀況有關。例如：傳統醫學認為女人生完孩子后，因為消耗了大量體力，身體是虛寒

的，因此要用溫熱的食物來補。最有名的補品就是麻油雞，大部分生過孩子的臺灣女性都吃過。如果一個人臉上長了青春痘，就是因為身體太燥熱而火氣大，要多吃去火的東西，也就是性質上比較寒涼的食物，像青草茶、綠豆湯、梨子等。

除了運用食材，人們也會用藥材跟食材一起烹飪，來得到更好的養生效果，這類食物稱為藥膳。如果家中有人身體虛弱，家人就會用一些大家熟悉的藥材跟雞肉或豬肉一起燉湯。人們相信喝了這樣的藥膳湯，就能早一點恢復健康。

臺灣的養生食補文化融合了古老智慧與現代生活，這些文化觀念，已經內化成臺灣人思想與生活的一部分。在養生的概念下，每一道補品不僅是食物，也是人們追求健康的指引，更是讓人身心安穩的基礎。

英文課文 Text in English

Wellness preservation is an integral part of Taiwanese life, with a particular emphasis on preserving wellness through diet. People believe that eating the right foods can not only maintain bodily health but also prevent and even treat illnesses, thus forming a unique wellness-preserving dietary culture.

Taiwan's wellness-preservation culture is influenced by traditional medicine, with the primary principle being the achievement of a balance within the body. From a dietary perspective, traditional medicine classifies food not according to Western nutritional concepts, but rather according to a foodstuff's properties of "cold," "cool," "warm," or "hot." The body is also understood according to depleted coldness or parched heatedness. If the body is in a state of depleted coldness, "warm" or "hot" foods are used to attain balance, which is also commonly called "replenishment." If the body is in parched heatedness, "cold" or "cool" foods are used to balance it, in what is commonly referred to as "dispelling heat."

How do people in daily life use food to preserve wellness? The first level pertains to climate. People will have different dietary replenishment methods in response to the four seasons of the year that are basically applicable to most people. For example, in summer, temperatures are high, and the body will be in a state of relatively parched heatedness. To balance this, people need cool replenishment, which is to say they need to ingest more of "cold" or "cool" foods, such as bitter melon, green tea and coconut juice. In winter, the weather is cold and the body's metabolism is slower. Often the result is cold hands and feet, calling for hot replenishment. People will eat more "warm" or "hot" foods, such as ginger duck and mutton hot pot, to warm up the body and boost their metabolism.

The second level is related to an individual's physical condition. For example, the traditional medicine belief that after childbirth, a woman's body is "depleted" and "cold" due to the large amount of energy expended; thus, "warm" or "hot" foods must be used to "replenish." The most famous replenishing dietary supplement is sesame oil chicken, which has been consumed by most Taiwanese women who have given birth. If acne appears on one's face, it is because their body is in parched heatedness with great internal heat, so they must consume more foods with relatively "cold" or "cool" properties, such as green herbal tea, mung bean soup, and pears.

Besides the use of foodstuffs, people also cook with both foodstuffs and medicinal substances as ingredients to achieve better wellness-preservation benefits. This type of food is termed a medicinal diet. If someone in a family has a weak or rundown constitution, family members will stew some familiar medicinal herbs with chicken or pork to make

soup. People believe that drinking this kind of medicinal soup will help them regain health sooner.

Taiwan's wellness-preserving dietary replenishment culture blends age-old wisdom with modern life, and these cultural concepts have been internalized as part of the Taiwanese people's thinking and lifestyle. Under the wellness-preservation concept, each replenishing supplement is not only a food; it is also a pointer for people's pursuit of good health, and even more, a foundation for feeling safe and secure both physically and mentally.

在臺灣人的日常飲食生活中，飲料具有相當重要的地位。對飲料的大量需求，不但使臺灣的飲料文化展現了驚人的創造力，發展出五花八門的現代飲料，也讓傳統飲料能夠繼續傳承。

臺灣的傳統飲料，主要的製作原則還是傳統的養生概念，使用的材料也都是自然的食材與藥材。除了大家都熟悉的用茶葉泡的茶，人們較常喝的，還有多種其他飲料。比方說在夏天，為了去火，預防中暑，最有名的就是「青草茶」，是由幾種性質較涼的草藥加水熬煮成的。夏季飲料中用草藥熬煮的，還有「仙草冰」，加上糖水與碎冰塊，冰冰甜甜的味道，很受大家歡迎。天氣冷

的時候，人們的手中，就換成了能讓身體溫暖的飲料，例如：「薑母茶」、「桂圓紅棗茶」。無論是能讓人去火的，還是能使人溫暖的飲料，這些連結著土地與生活的傳統飲料沒有過時，仍然在現代臺灣人心中占有一席之地。

1980 年代後，隨著經濟起飛與飲食西化，臺灣的飲料文化開始出現革命性而且偏向西化的改變。其中最具代表性的，就是手搖飲料，在臺灣簡稱「手搖飲」。手搖飲的品項非常多，最有名的當然是珍珠奶茶，不僅在臺灣，更在國際上引起極大的熱潮。2018 年由手搖飲連鎖品牌「Kung Fu Tea」發起，訂定 4 月 30 日為國際珍奶日，正式奠定了珍珠奶

茶在國際上的地位。除了手搖飲以外，咖啡在臺灣的發展也很迅速。從年輕人到年長者，人們對咖啡的接受度與品味逐年提升。咖啡館不再只是喝飲料的地方，更是閱讀、工作、社交的空間。咖啡已經融入臺灣飲料文化中，成為相當重要的一個部分了。

飲料雖然不是生存的首要需求，但帶給人們許多樂趣和幸福感。在飲料世界中，臺灣人是幸福的。除了擁有深厚的傳統養生知識，也因為臺灣的農業與製作技術發達，食材豐富，品質優良，再加上臺灣人的創新精神，使得臺灣具有良好的基礎，能夠不斷突破，為人們帶來更多好喝健康又有趣的飲料。

英文課文 Text in English

Beverages have a very important position in the daily dietary life of Taiwanese people. Enormous demand for beverages has not only made Taiwan's beverage culture demonstrate remarkable creativity in developing a wide variety of modern drinks; it has also allowed traditional beverages to continue their legacy.

The primary principle behind traditional Taiwanese beverages is the concept of wellness preservation, and the materials used are natural foodstuffs and herbs. Besides tea brewed from tea leaves that is familiar to everyone, there are many other beverages that people drink relatively often. For example, in summer, to dispel heat and prevent heatstroke, the most well-known is green herbal tea, made by boiling several kinds of herbs in water with relatively cool characteristics. Among summer drinks that are herbal decoctions, there also is grass jelly ice, topped with sugar syrup and pulverized ice cubes, with an icy-sweet flavor that is well-received by all. When the weather gets cold, what people hold in hand switches to beverages that warm the body, such as ginger tea and longan and red date tea. Regardless of whether they are beverages that can let people dispel heat or get warm, these

traditional beverages that are closely connected to our land and life have not gone out of style and still occupy a special place in the hearts of modern Taiwanese people.

After the 1980s, with the economic boom and dietary Westernization, revolutionary and Westernization-biased changes began to appear in Taiwan's beverage culture. The most representative among them was the emergence of beverages shaken by hand, in Taiwan called "hand-shaken drinks" for short. There are many varieties of hand-shaken drinks, the most famous being bubble tea, which has sparked an enormous mass fervor not only in Taiwan but also internationally. In 2018, initiated by the hand-shaken drink chain brand, Kung Fu Tea, April 30th was designated as National Bubble Tea Day, officially establishing bubble tea's international status. Besides hand-shaken drinks, the development of coffee in Taiwan has also been rapid. From young people to elders, the degree of people's acceptance and appreciation of coffee has increased year by year. Coffee shops are no longer just places to drink beverages; they are even more spaces for reading, working, and socializing. Coffee has already been incorporated into Taiwan's beverage culture, and has become a substantially important part of it.

Although beverages may not be the foremost necessity for survival, they bring people much joy and contentment. In the world of beverages, Taiwanese people are blessed. Besides possessing profound traditional wellness-preservation knowledge, Taiwan's agriculture and production techniques are advanced, its ingredients are abundant and the quality is high. Add to this the innovative spirit of the Taiwanese people, and all this results in Taiwan having a superb foundation for being able to continuously make breakthroughs that bring people ever more delicious, healthy, and fascinating beverages.

課文 Text

近七十年來，臺灣教育制度隨著社會、經濟與政治的發展也逐漸改變，經過教育普及時期、多元入學時期等改革階段。這些改革不僅改變了教育制度，也深刻影響了一般人的教育觀念，使「唯有讀書高」的價值觀逐漸鬆動。

1968 年起，臺灣開始實施九年義務教育，全民接受小學與國中教育，大幅提高了識字率與基礎知識。但是這個階段的教育以升學為目標，強調「努力讀書」，學生都希望能考取好高中，再進入知名大學，使「升學是唯一出路」的觀念成為根深蒂固的教育文化。

二十世紀，八〇年代，臺灣經濟起飛與社會開放，設立了許多新大學，

Lesson 09 臺灣教育制度及觀念之改變

高等教育普及化，但學生進入高中、大學，還是只有通過聯考這一個管道，因此學生的升學壓力仍然沉重。「考試決定未來」的現象使學生、家長、老師都過度重視分數，死背硬記的「填鴨式教育」更忽視了思考能力的培養。學生為了進入好大學，下課後還得去補習班補習，造成家庭與學生的負擔。民眾開始呼籲教育改革，傳統「分數第一」的觀念開始受到挑戰。

▲ 大學學科能力測驗是學生進入大學的篩選依據

二十一世紀，臺灣教育制度開始改革，大學採用多元管道入學，推甄或申請方式取代了「一試定終身」的聯考制度。學生不再只靠一次考試進入理想的學校，減少了考試給學生帶來壓力與身心問題。至於課程改革方面則強調融合各領域知識，培養學生自主性、思考力、創造力、民主素養、國際觀等，更以尊重多元文化與族群為目標。

隨著教育制度的改革，教育價值也發生了變化，這些轉變不僅影響學生學習方式，也深刻動搖了社會長久以來的教育價值觀。一般人不再把藝術、體育與技職教育視為次要選擇，而是和主要學科並重，慢慢取代了傳統「唯有讀書高」的觀念。

教育是國家的百年大計，教育制度的影響不僅跟個人與社會的發展有關，也跟國家競爭力有關。雖然有人認為過去的聯考制度提高了臺灣的教育水準，並且培養了許多優秀人才，但現今社會發展多元，國際情勢變化快速，未來的教育制度必須跟上全球發展的腳步。

英文課文 Text in English

Over the last seventy years, Taiwan's education system has gradually changed in line with social, economic, and political developments, going through such reform phases as a period of universal education and a period of diversified enrollment. These reforms have not only changed the education system; they have also profoundly influenced the concept of education for ordinary people, leading to a gradual loosening of the belief that "only studying is noble."

Starting in 1968, Taiwan began implementing nine-year compulsory education, in which the entire citizenry received an elementary and junior high school education, significantly raising the literacy rate and basic knowledge. However, education at this stage had as its goal attaining the next level of education, and emphasized "studying hard." All students hoped to test into a good high school and then get into a prestigious university, leading to the concept that "higher education is the only way out" becoming deeply ingrained in the educational culture.

In the 20th century during the 1980s, Taiwan's economy took off and society opened up, leading to the establishment of many new universities and to higher education becoming universal. However, students still only had one path to enter high school and university—going through the Joint Entrance Examination. Thus, the pressure on students to attain the next level of education was still heavy. The phenomenon of "exams determining one's future" caused students, parents, and teachers to overemphasize grades; rote memorization, a "cramming" style of education, further neglected the cultivation of critical thinking skills. To get into good universities, students had to attend cram schools after class, causing a burden for families and students. The public began to call for educational reform, and the traditional "grades first" concept started to come under challenge.

In the 21st century, Taiwan's education system began to reform; universities adopted multiple admission pathways, with recommendation and application methods replacing the "one-exam-determines-your-future" Joint Entrance Examination system. Students no longer rely solely on a single exam to enter their ideal schools, reducing the pressure as well as physical and mental problems that taking exams give them. As for the curriculum reform aspect, emphasis is on merging knowledge from various fields, cultivating a student's autonomy, thinking ability, creativity, democratic attainment, and international outlook; and even more, respect for multiculturalism and ethnic diversity are the objectives.

With education system reform, changes have also occurred in education values. These transformations have not only affected the methods by which students learn; they have also profoundly shaken society's long-held educational values. Ordinary people no longer regard arts, sports, and vocational education as secondary choices, but rather assign them equal importance with major subjects, slowly replacing the traditional concept of "only studying is noble."

Education is a nation's long-term grand undertaking, and the influence of the education system not only relates to individual and societal development; it also pertains to national competitiveness. Although some believe that the Joint Entrance Examination system of the past raised Taiwan's educational standards and cultivated many outstanding talents, social development today is diverse and the international situation is changing rapidly, so the education system of the future must keep pace with global development.

從科技、體育、文化到技職，臺灣各領域都有傑出的人物與成就。這些在世界舞台上努力發光的臺灣人，以及讓世界看見台灣價值的產業，我們都賦予「臺灣之光」這個稱號。

科技產業是臺灣的強大後盾。從半導體、資訊電子到智慧製造，都在世界上占關鍵地位。然而，這樣的成就並非偶然，而是與政府的產業政策息息相關。1960 到 1980 年代，政府推動「出口導向」政策、設立加工出口區並吸引外資。這段期間，製造業蓬勃發展，創造了後來的臺灣經濟發展奇蹟。

1973 年成立的工業技術研究院，是臺灣科技發展的轉折點。工研院不僅引

Lesson 10 臺灣之光

進國外的半導體技術，也培育了臺灣第一代科技人才，台積電就是在工研院的基礎上誕生的。1990 年代以後，全球資訊化浪潮興起，臺灣電腦品牌打入國際市場，半導體代工模式更使台積電成為全球無可取代的企業。同時，臺灣的技職教育培育了大量優秀的工程師與技術人員，使科技產業擁有充足的人才來源。到了今日，臺灣已建立起完整的科技供應鏈，這些產業都是臺灣科技競爭力的基礎。

除了科技產業以外，臺灣在許多領域也嶄露頭角。在體育方面，臺灣的棒球隊世界知名，無論在少年棒球比賽或是成人棒球賽都獲得過世界冠軍。許多棒球選手更受外國球隊重用，進軍國際

球壇。另外，羽毛球、網球、桌球等運動領域也都有全球頂尖的選手。

在文化與藝術方面，臺灣也不斷發光。導演李安兩度獲得奧斯卡最佳導演獎。林懷民帶領雲門舞集世界巡迴演出，得到極高的評價。另外，在音樂、烹飪、烘焙、服裝與工業設計領域也都有許多世界級人才。

Lesson 10 臺灣之光

這些亮眼成就的背後，教育改革扮演了重要角色。近年來，台灣的教育走向多元發展。藝術教育給學生展現創意的空間。設立體育班與完善的訓練制度，使選手能在良好環境中成長。技職教育則強調實務與創新能力，培育出支撐科技與製造業的重要人才。烹飪、餐飲與設計相關科系也提供年輕人發揮天賦的舞臺。正因為教育開放與多元，學生更能找到自己的方向，才造就今日這麼多的「臺灣之光」。

「臺灣之光」是教育制度的改革與所有人努力的成果，讓世界都看見臺灣的光芒。

英文課文 Text in English

Taiwan has outstanding figures and achievements in every field, from science and technology, sports, and culture to vocational skills. We bestow this appellation, “The Pride of Taiwan,” on these Taiwanese who shine on the world stage, as well as on the industries that allow the world to see Taiwan’s value.

The technology industry is Taiwan’s powerful backstop. It occupies a key position globally from semiconductors and information technology to smart manufacturing. However, this achievement is no accident; it is closely connected with the government's industrial policies. From the 1960s to the 1980s, the government promoted an export-oriented policy, established export processing zones, and attracted foreign investment. During this period, the manufacturing industry developed vigorously, creating Taiwan's subsequent economic miracle.

The Industrial Technology Research Institute (ITRI) established in 1973 was a turning point in Taiwan's technological development. ITRI not only introduced foreign semiconductor technology but also cultivated Taiwan's first generation of technological talent; and Taiwan Semiconductor Manufacturing Company (TSMC) emerged from the foundation laid by ITRI. From the 1990s onward, a wave of global IT transformation arose, Taiwan’s computer brands broke into the international market, and the semiconductor foundry model further made TSMC into an irreplaceable global company. Meanwhile, Taiwan's vocational education has cultivated a large number of outstanding engineers and technical personnel, allowing the technology industry an abundant source of talent. As of today, Taiwan has established a complete technology supply chain, and these industries are all the foundation of Taiwan's technological competitiveness.

Apart from the technology industry, Taiwan has also made a splash in many other fields. In the realm of sports, Taiwan's baseball teams are world-renowned for the world championships they have won, be it in youth or adult baseball competitions. Many baseball players have been put in important positions on foreign ball teams, advancing to international ball arenas. In addition, Taiwan also has top-level players in such sports fields as badminton, tennis, and table tennis.

In the realms of culture and art, Taiwan also continues to shine. Director Ang Lee has won the Academy Award for Best Director twice. Lin Hwai-min led the Cloud Gate Dance Theatre on a world tour, receiving extremely high appraisals. Furthermore, Taiwan also has numerous world-class talents in the fields of music, cooking, baking, fashion, and industrial design.

Behind these striking achievements, educational reform has played a crucial role. In recent years, Taiwan's education has moved towards pluralistic development. Art education provides students with space to showcase creativity. The establishment of sports classes and a comprehensive training system enables athletes to grow up in a favorable environment. Vocational education emphasizes practical and innovative abilities, cultivating key talents to support technology and manufacturing. Departments pertaining to the culinary arts, food and beverages, as well as design also provide a stage for young people to put their innate talents to use. It is precisely because education is open and pluralistic, with students better able to find their own direction, that so many today have been brought up to be "The Pride of Taiwan."

"The Pride of Taiwan" is the result of educational system reform and everyone's effort, allowing the world to see Taiwan's brilliance.

在全球化快速發展的今日，世界各國之間的聯繫日益緊密，任何一個地區面臨的問題，都可能對整個國際社會產生深遠影響。無論是自然災害、人道危機、傳染病擴散，或是科技發展帶來的挑戰，都顯示出國際合作的重要性。

在這樣的時代背景下，「Taiwan Can Help」不僅是一句口號，更代表臺灣願意參與世界、以實際行動貢獻國際社會的決心與能力。

在公共衛生與醫療領域方面，臺灣累積了相當成熟的專業經驗。1995 年建立全民健康保險制度後，透過完善的醫療體系，使多數民眾能以合理成本獲得醫療照護，提升整體社會健康水準。當

面對傳染病與公共衛生危機時，臺灣能迅速整合醫療專業、行政資源與科技工具，展現高度的應變能力與社會合作精神。更重要的是，臺灣積極透過交流、醫療合作與人員培訓，將公共衛生與醫療經驗分享給國際社會，協助其他國家強化醫療體系，實踐臺灣在全球公共衛生領域中的價值。

除了醫療制度的建立，臺灣在防災與緊急應變訓練方面同樣不遺餘力。臺灣位於地震、台風頻繁的環境，因此長期重視災害預防與應變能力的培養。政府建立完整的災害應變機

制，並在學校、社區與職場推動防災教育與演練，使民眾熟悉避難流程與自救原則。這些制度化訓練提升了社會整體韌性，使臺灣在災害發生時能迅速動員，降低損失。

由於防災經驗的累積，臺灣在人道援助與國際關懷方面，也展現出高度責任感。當世界各地發生天災或人道危機時，不僅有來自臺灣政府的援助行動，民間力量也不可忽視。許多非政府組織長期參與國際救援、醫療服務與教育協助。宗教團體抱持人道關懷精神，不分國界與信仰走入災區。來自各行各業的志工，也主動投入物資整理、翻譯協助與重建行動，展現臺灣社會的溫暖。

在科技與產業發展方面，臺灣現今扮演極重要的角色。臺灣在半導體、

發生重大災難時，僑民主動募集資源、聯繫當地社群，使各項援助行動能順利進行。同時，海外僑民熟悉當地語言與文化，成為臺灣與國際社會之間的重要橋梁，透過公共倡議與社區參與，提升臺灣的國際能見度。

總而言之，「Taiwan Can Help」的意義在於臺灣不僅具備幫助世界的能力，也擁有願意分享、合作與承擔責任的胸懷。從公共衛生、防災體系、人道援助，到科技產業，再加上海外僑民的共同參與，臺灣以實際行動證明自己是國際社會中具責任感的一員。面對未來更加複雜多變的全球挑戰，只要世界願意看見臺灣、接納臺灣，臺灣也將持續用行動證明臺灣在國際社會上的價值。

英文課文 Text in English

In today's rapidly globalizing world, as connections between countries become increasingly close, problems faced by any region can generate a profound impact on the entire international community. Whether it be natural disasters, humanitarian crises, the spread of infectious diseases, or the challenges brought about by technological development, all show the importance of international cooperation. Under this backdrop, "Taiwan Can Help" is not just a slogan, it represents even more Taiwan's willingness to participate in the world and its determination and ability to contribute to the international community through concrete actions.

In the fields of public health and healthcare, Taiwan has accumulated quite mature professional experience. Since establishing a universal health insurance scheme in 1995, via a comprehensive healthcare system, Taiwan has enabled most people to access medical care at a reasonable cost, improving the overall health level of society. When facing infectious diseases and public health crises, Taiwan can quickly integrate medical expertise, administrative resources, and technological tools, demonstrating a high degree of responsiveness and spirit of social cooperation. More importantly, Taiwan actively shares its public health and healthcare experience with the international community through exchanges, medical cooperation, and personnel training, to assist other countries

in strengthening their healthcare systems and thereby realizing Taiwan's value in the global public health field.

In addition to establishing a medical treatment scheme, Taiwan has spared no effort in disaster prevention and emergency response training. Located in an environment where earthquakes and typhoons are frequent, Taiwan has long emphasized disaster prevention and cultivation of response capabilities. The government has established a comprehensive disaster response mechanism and promotes disaster prevention education and drills in schools, communities, and workplaces, familiarizing the public with evacuation procedures and self-help principles. This institutionalized training has enhanced the overall resilience of society, enabling Taiwan to mobilize quickly and reduce losses when disasters occur.

Due to its accumulation of disaster prevention experience, Taiwan has demonstrated a sense of responsibility to a high degree in humanitarian aid and international concern. When natural disasters or humanitarian crises occur around the world, in addition to the aid initiatives of the Taiwan government, the power of civil society cannot be ignored. Many non-governmental organizations have long participated in international relief, medical services, and educational assistance. Religious groups, harboring the spirit of humanitarian concern, go to disaster areas regardless of nationality or religious belief. Volunteers from all walks of life also proactively participate in sorting supplies, translation assistance, and rebuilding efforts, demonstrating the warmth of Taiwanese society.

Taiwan plays a vital role in science and technology, as well as industrial development. Having deeply cultivated expertise in semiconductors, information technology, and precision manufacturing over many years, Taiwan has established a highly competitive industrial system to become a crucial pillar of global technological development. The international community relies on technological products and digital systems, and the technology and expertise Taiwan provides have a crucial impact on maintaining the stability of the global supply chain and advancing technological innovation.

In addition, Taiwanese expatriate communities spread all over the world in various lands serve an important role in the process of promoting Taiwan's participation in the international community. Expatriates residing overseas for a long time not only care about Taiwan's development but also actively support government-led international aid and cooperation initiatives. When major disasters occur in the international community, Taiwanese expatriates proactively collect resources and connect with local communities to facilitate the smooth implementation of aid operations. At the same time, their familiarity with local languages and cultures makes them important bridges between Taiwan and the international community, enhancing Taiwan's international visibility through public initiatives and community participation.

In conclusion, the significance of "Taiwan Can Help" lies in not just that Taiwan has the capability to help the world, but that it also has a willing heart to share, cooperate, and assume responsibility. From public health, disaster prevention systems, and humanitarian aid to the joint participation of the technology industry , in addition to the participation of overseas Taiwanese communities, Taiwan has proven through concrete actions that it is a responsible member of the international community. Facing increasingly complex and volatile global challenges in the future, as long as the world is willing to see and accept Taiwan, Taiwan will continue to prove its value in the international community through its actions.
